Fuel consumption data and CO2 emission data are determined according to Regulation (EC) No. 715/2007, taking into consideration the vehicle mass in running order, as specified by the regulation. Additional equipment may lead to slightly higher results than the stated fuel consumption and CO2 figures. The figures for fuel consumption and CO2 emissions do not relate to a specific vehicle and are not part of an offer. They are provided only for the purpose of comparison between different vehicle types. Average CO2 emission of all new cars sold in Switzerland: 144g/km
